

## VAA512 Expected life time

- Above expected life time is calculated according our calculation standard.
- Please refer derating curve shown in instruction manual about the maximum value of ambient temperature.
- There sometimes a case in the area of over 100,000 hours which is different from the graph caused by the degradation of sealing rubber that does not include in the calculation.

## Measurement conditions

1. Input voltage AC85~132V 60Hz

2. Output voltage/  
current

Load factor:

100%

75%

50%

25%

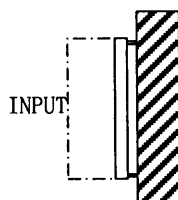

[12V 0.45A]	[12V 0.34A]	[12V 0.23A]	[12V 0.11A]
-------------	-------------	-------------	-------------

3. Cooling method

Convection

4. Mounting method

Refer below

Mounting method : (C)
